8 of 8 review helpful What a disappointment By Roger Sweeny There are a lot of good ideas in this book 1 Prosperity requires cheap energy At the present moment no ldquo green rdquo energy is cheap Preventing poor people from using ldquo non green rdquo energy keeps them in poverty And this isn rsquo t Americana poverty where the poor have cars and televisions It is third world poverty where people live on Reveals a dark secret of the ideological environmental movement The movement imposes the views of mostly wealthy comfortable Americans and Europeans on mostly poor desperate Africans Asians and Latin Americans It violates these people s most basic human rights denying them economic opportunities the chance for better lives the right to rid their countries of diseases that were vanquished long ago in Europe and the United States This book is the first one I ve seen that tells the truth and lays it on the line Patrick Moore Greenpeace co founder Developing countries need to be free to make their own decisions how to improve their people s lives Great book
