Oil Injustice examines the mobilization efforts of four communities with different oil histories in response to the construction of an oil pipeline. Using multiple sites in Ecuador as case studies, Patricia Widener examines the efforts of grassroots groups, non-governmental organizations, activist mayors, and transnational advocates that mobilized to redefine the country's oil path and to represent the voice of many local communities and organizations that sought In. Oil Injustice, Widener skillfully exposes the global political economy as a bully that systematically and strategically exploits both the world's natural resources and its poorest citizens. Seemingly beyond reproach.
