For the past 50 years a select group of scientists has provided advice to the US President mostly out of the public eye on issues ranging from the deployment of weapons to the launching of rockets to the moon to the use of stem cells to cure disease. The role of the presidential science adviser came under increasing scrutiny during the administration of George W Bush which was highly criticized by many for its use and some say misuse of science. This edited volume From the Back Cover For the past 50 years a select group of scientists has provided advice to the US President mostly out of the public eye on issues ranging from the deployment of weapons to the launching of rockets to the moon to the use of stem cells to cure
