I The work of Ludwig Boltzmann 1844 1906 consists of two kinds of writings in the first part of his active life he devoted himself entirely to problems of physics while in the second part he tried to find a philosophical background for his activities in and around the natural sciences. Most scientists are much more aware of his creative work in physics than of his digressions on the meaning and structure of science. I think in the present case the reason is Language Notes Text English German translation
